

Alliance Partners

Supply Chain Solutions You Can Trust

GS1 Australia works with ICT companies that share its business solutions-oriented vision of delivering real supply chain benefits to Australian businesses of all sizes – from small businesses to enterprise corporations.

As a result, you can rely on over 80 GS1 Alliance Partners that can provide a diverse range of supply chain hardware, software, communications products and services solutions to assist you with the implementation of the GS1 System in your business.

The range of products and solutions include:

- Software & Applications
- Warehouse, Transport & Logistics
- eCommerce Enablement
- Telecommunications
- Data Warehousing & Management
- Training & Consulting Services
- Hardware & Mobility Products
- Systems Integration
- Printers & Label Suppliers
- Industry Specific Solution Services

All GS1 Alliance Partners are GS1 System Accredited by GS1 Australia, so you can trust that their –

- Solutions are compliant, proven and effective with the global GS1 System of standards; and
- Professionals have gone through GS1 Certification Training and ongoing updates.

Strategic Alliance Partner

Partner Profile

Bizcaps is an Australian-based company with a very strong commitment to product data management and synchronisation and to the GS1net system. It was the first product certified for GS1net.

Bizcaps has solutions for managing data on GS1net and the NPC that start from simple bureau services, through stand-alone software solutions, up to tightly-integrated systems that are served by purpose-built or standard workflows controlling product lifecycle management activities such as new product development or recipe and formula management.

Bizcaps developed and markets scalable Bizcaps Enterprise software solutions for Catalogue, Master Data, and Product Data Management including integration to ERP and other corporate systems and validating and uploading data to datapools such as GS1net and the National Product Catalogue (NPC).

Bizcaps support unit also operates an expert bureau service, in both Sydney and Melbourne, which will create and maintain data on GS1net and the NPC, for those companies wishing to outsource their data maintenance to an expert organisation.

Bizcaps also markets Bizcaps BPM, an intuitive tool to automate any business processes, so that they operate more smoothly, run faster, reduce error and costs and improve productivity across multiple business units. BPM integrates quickly with existing systems, allowing legacy systems to be quickly combined and connected in new ways to rapidly implement valuable new business processes.

Version: 01 July 2009 to 30 June 2010

Rob Clifton-Steele, Bizcaps Managing Director, is presented in with the Alliance Partner plaque by Mark Fuller, GS1 Australia COO, watched by Joseli Munive, Manager Alliances & Government Policy
