

BIZCAPS SERVICE BUREAU: RAPID RESPONSE NPC CATALOGUE CREATION AND SUPPORT

"We are now NPC compliant and LIVE. Bizcaps staff, in particular Drew Hayes, were extremely helpful and supportive to get this project finally across the line."

Cantarella Bros

"Many thanks for your fantastic support, patience and expertise with this project Drew. It is much appreciated."

Sanofi Pasteur

"Our key contacts at Bizcaps were great communicators. Coupled with the services and products they were offering, Bizcaps was the standout choice for us."

Mayo Healthcare

LET'S PUT YOU IN THE PICTURE

Are you lacking time, knowledge or the resources to undertake the work of creating or even maintaining a National Product Catalogue (NPC)?

Bizcaps Service Bureau gives you complete peace of mind and comprehensive assistance for:

- design and creation
- implementation
- ongoing maintenance

of your Product Data Catalogue(s). This enables the synchronising of item and pricing data with trading partners via methods such as the NPC, UBF's or other electronic buying forms.

We can manage all of your ongoing NPC requirements – to ensure that your Catalogue is constantly up to date, and that any new product and pricing data, or changes to existing data will be quickly and accurately forwarded to your customers.

BIZCAPS SERVICE BUREAU IN BRIEF

- Takes care of the technology and data requirements for a rapid result.
- Can assist any size company, permanently or temporarily.
- Provides help ranging from taking full responsibility for all product data through to simply covering unexpected staff absences or peak workloads.
- Accepts product and pricing data in almost any format convenient to a supplier and loads it to the NPC.
- Operates across Australia, New Zealand and the United Kingdom.
- Is backed by Bizcaps Software's vast experience in electronic product catalogues and data synchronisation services.

To meet your needs, Bizcaps Service Bureau services include some – or all – of the following:

Interview and checklist review	Identify crucial preliminary design information such as trading partners, types of products, makeup of product hierarchies, anticipated additions and updates and frequency of changes.
Workshop to review data requirements	Explain the customised data dictionary and data collection template that simplifies data collection and discuss all fields and requirements (mandatory, conditional and optional data) and validation rules.
Data sample reviews	Review sample data files in almost any format (e.g. MS Excel, CSV, DDF) for completeness, compliance, accuracy and currency of data.
Gap analysis and data quality assessment	Report findings to you with recommendations (including gaps identified and/or to be filled, inaccuracies to be removed or new fields populated).
Data mapping	Provide assistance (on-site or remote) to match your existing data to relevant catalogue data requirements, while considering an appropriate catalogue maintenance method (e.g. integration, licensed middleware or Bureau).
Testing	Handle loading of data, data validation via Bizcaps Connect and initial and ongoing reporting of processing activities and results.
Catalogue sustainability processes and data collection	Analyse what processes are in place to ensure item and pricing data is kept up to date and how changes will be processed into your catalogues.
Education and Training	Provide comprehensive training on all aspects of master data and product data catalogue creation and maintenance.
NPC Ready	Liaise with GS1 and manage the initial data publish (load) process, request an NPC Ready assessment and manage responses and queries from GS1.
NPC Live	Manage the subsequent initial data publish (load) process to your trading partners and assist with responses and queries from them.
Ongoing Support	Rapid Deployment clients have access to Bizcaps Support and can engage Bizcaps for subsequent assistance including expanding a product range, entering new industry verticals, implementing changes to standard NPC or trading partner requirements and temporarily (or otherwise) maintaining your processes.
